

Parents & Primary Caregivers of healthy children ages 7-12 years...

WE NEED YOUR HELP!

What will you do?

You will visit the Pediatric Pain, Health and Communication Lab at the University of Guelph to take part in an important project studying how parents respond when their children have pain. The visit will take 1 hour. For helping, *you will be entered into a draw to win one of two gift baskets of \$50 value (odds 1 in 50) and money for parking.* Your child will receive a small toy.

Why should you help?

You and your child will be able to contribute to important research which will help us learn how to decrease child pain and anxiety during painful medical procedures.

Interested?

To learn more, please contact the PPHC Lab at:
519-824-4120 x 52342
